August 25, 2010

The Indiana Department of Environmental Management (IDEM) has prepared this fact sheet to inform the public of the process involved in issuing a Hazardous Waste Management Permit Class 3 Modification to Heritage Environmental Services Landfill (HES).

The Solid Waste Disposal Act, commonly known as the Resource Conservation and Recovery Act (RCRA) was passed in 1976. This allowed for the regulation of the management of hazardous waste. In the State of Indiana, the IDEM is authorized by the Indiana Environmental Statute, IC 13-22, to administer the hazardous waste permit program and related hazardous waste management requirements. Any facility which treats, stores, and/or disposes of hazardous waste in the State of Indiana is required to obtain a final hazardous waste management permit. In addition, any hazardous waste facility receiving a permit is required to provide corrective action for all releases of hazardous waste or hazardous waste constituents from any solid waste management unit on-site.

#### Facility Description

HES operates a hazardous waste landfill (Unit 2) at 4370 W CR 1275 N, Roachdale, Indiana.

#### Modifications to the State Permit

The Class 3 Permit Modification will expand the operating capacity for the Unit 2 Landfill by modifying the landfill footprint to include an additional cell.

#### Public Participation

The public comment period for this operating permit modification began on the date of the public notice, August 25, 2010, and ends on October 11, 2010. The official public notice was published on August 25, 2010, in the Banner Graphics, Greencastle, Indiana. Written comments with supporting documentation should be mailed to:
